

Saif Damra

AI Engineer | Data Scientist

saif.damra@outlook.com | +962 7878 20 746 | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Certified AI Engineer and Data Scientist (AWS, Deep Learning) specializing in NLP, Computer Vision, LLM, and workflow automation. Adept at developing AI-driven solutions and translating raw data into actionable insights using Power BI. Strong background in technical instruction, enabling seamless communication of complex architectures to technical and non-technical stakeholders.

EXPERIENCE

CoderZ for Software and Training | Amman, Jordan Data Analyst & BI Specialist | Aug 2025 – Present

- Engineered a high-performance **ETL Data Pipeline** using **Python** to sync over **250,000 daily IoT records** from MySQL to SQL Server in under **3 minutes**. Architected complex **T-SQL Views** to classify fleet compliance across **6 distinct operational scenarios**.
- Internal Tooling & Automation:** Developed and deployed a custom real-time attendance tracking system using **n8n** and **self-hosted VPS**, automating administrative tasks and reducing manual data entry by 100%.
- Workflow Automation:** Engineered automated reporting pipelines using **Microsoft Power Automate**, replacing manual distribution with streamlined workflows for real-time stakeholder updates.
- Dashboard Development:** Designed and deployed interactive Power BI dashboards, utilizing advanced **DAX** and data modeling to translate raw business data into actionable strategic insights.
- Data Optimization:** Managed end-to-end data analysis processes, ensuring high data quality and distinct reporting accuracy to meet complex client requirements.

Data Science & AI Trainer | Sep 2025 – Present

- Program Leadership:** Successfully trained and mentored **150+ learners** (university students to corporate professionals), bridging the gap between theoretical AI concepts and production-level industry application.
- Advanced Curriculum Delivery (DataHub Bootcamp):** Delivered a 150+ hour intensive track covering the full data lifecycle. Instructed on **Deep Learning architectures (CNNs, RNNs, Transformers)** using **PyTorch**, alongside NLP and Computer Vision.
- Business Intelligence Training (BI Bootcamp):** Led comprehensive training on data storytelling, guiding participants through advanced Data Modeling and dashboard design for business case studies.
- Project Mentorship:** Supervised end-to-end Capstone Projects, ensuring learners achieved job readiness by building deployable AI models and solving real-world data problems.

Petra Ride | Amman, Jordan AI Engineer Part Time | Feb 2025 – Aug 2025

- NLP & Sentiment Analysis:** Architected an automated feedback system that analyzes Instagram comments (Positive/Neutral/Negative) and generates real-time, context-aware replies using **OpenAI LLMs**.
- Computer Vision & Security:** Developed AI-driven identity verification solutions using **AWS Rekognition**, implementing face liveness detection to significantly reduce fraud and enhance user authentication speed.
- Model Deployment:** Built and deployed scalable computer vision models, integrating them directly into the company's security infrastructure.

CoderZ for Software and Training | Amman, Jordan AI Co-Instructor | Feb 2025 – Jun 2025

- Co-facilitated Python and AI training modules, simplifying complex algorithms into practical, hands-on exercises for multidisciplinary cohorts.

PROJECTS

1) Social Media Sentiment Analysis & Customer Voice Pipeline

- Tech Stack:** Python, n8n (Automation), Meta Graph API, NLP (OpenAI).
- Architected an end-to-end automation pipeline using **n8n** to ingest real-time comments from **Facebook & Instagram** via official APIs.
- Implemented advanced **NLP models** to analyze customer feedback, classifying sentiment (Positive, Neutral, Negative) to extract actionable insights on brand reputation.

2) AI-Powered Meeting Scheduler Bot (Voice & Text)

- Tech Stack:** Python, OpenAI API, Telegram API, Google Calendar API.

- Developed an AI agent that schedules meetings through Telegram using natural language (text or voice). The system uses OpenAI to understand user intent, extracts meeting details, and automates calendar event creation and email reminders using Google Calendar and Gmail APIs.

3) Arabic Text Processing & Classification

- **Tech Stack:** Python, Hugging Face (BERT), NLP.
- Developed an NLP pipeline for Arabic news classification, achieving 95% accuracy with BERT. Refined data preprocessing and feature engineering, improving model accuracy and macro F1-score.

4) AI-Driven Occupancy Detection Using Multisensor Data Analysis

- **Tech Stack:** Python, Scikit-Learn, Pandas.
- Developed a machine learning model for indoor occupancy estimation using non-intrusive sensors, enhancing smart building energy efficiency through real-time HVAC and lighting adjustments.

KEY SKILLS

- **Languages & Frameworks:** Python, SQL, FastAPI, REST APIs, SQLAlchemy, PyTorch, Scikit-Learn.
- **AI & Data Science:** Machine Learning, Deep Learning (CNN, RNN, Transformers), LLMs, Prompt Engineering, NLP, Computer Vision, RAG, BERT, AI Agents.
- **Cloud & MLOps:** Docker, Git, AWS (Rekognition), n8n, VPS Deployment.
- **BI & Analytics:** Microsoft Power BI (Advanced DAX), PostgreSQL, Excel, Dashboarding.
- **Soft Skills:** Technical Training, Curriculum Design, Stakeholder Management, Public Speaking.

CERTIFICATES

- D-180 Digital Mentoring Program | Deloitte
- AWS Certified AI Practitioner
- Nutanix Certified Associate (NCA) 6.10
- Generative Adversarial Networks (GANs) | Coursera
- Neural Networks and Deep Learning | Coursera
- Machine Learning Specialization | Coursera
- The Complete SQL Bootcamp: Go from Zero to Hero | Udemy

EDUCATION

Al Hussein Technical University (HTU) Amman, Jordan	2021-2025
B.Sc. in Data Science and Artificial Intelligence	
Pearson BTEC / Al Hussein Technical University (HTU)	Feb 2025
Level 5 Higher National Diploma (HND) in Computing	

VOLUNTEERING

- Technical Team Member | Data Science Club – HTU | Apr 2023 – Dec 2023
- Teaching Assistant | Mind Lab – Amman, Jordan | Aug 2022
- Volunteer | The Children's Museum Jordan | Nov 2021
