

Saif Damra

AI Engineer | Data Scientist

saif.damra@outlook.com | +962 7878 20 746 | [LinkedIn](#) | [Portfolio](#)

SUMMARY

AI Engineer and Data Scientist specializing in LLM applications, RAG systems, and Arabic/English NLP, with hands-on experience taking AI solutions from prototype to production (FastAPI, Docker). Background spans computer vision, ETL pipelines, workflow automation, and Power BI analytics. AWS Certified AI Practitioner and data science trainer who has mentored 150+ learners, skilled at explaining complex systems to technical and non-technical stakeholders.

EXPERIENCE

CoderZ for Software and Training | Amman, Jordan Feb 2025 – Present

AI Engineer & Data Analyst Aug 2025 – Present

- Bilingual RAG Assistant:** Built a customer-facing Arabic/English **RAG** assistant that answers questions about 24 courses strictly from company data, using **hybrid retrieval** (dense embeddings + BM25 via Reciprocal Rank Fusion) on **Qdrant** with **LlamaIndex**, plus guardrails against hallucination and prompt injection.
- RAG Evaluation & Deployment:** Validated the system with a 29-question evaluation harness (hit@k, MRR, LLM-as-judge), reaching **100% top-5 retrieval accuracy** and 100% correct out-of-scope refusals; shipped a **FastAPI** backend and an embeddable RTL/LTR chat widget via **Docker** and Traefik over HTTPS.
- ETL Data Pipeline:** Engineered a high-performance **Python** ETL pipeline syncing **250,000+ daily IoT records** from MySQL to SQL Server in **under 3 minutes**, with **T-SQL Views** classifying fleet compliance across **6 operational scenarios**.
- Internal Tooling & Automation:** Built and deployed a real-time attendance tracking system using **n8n** on a **self-hosted VPS**, eliminating manual attendance entry.
- Workflow Automation:** Engineered automated reporting pipelines using **Microsoft Power Automate**, replacing manual distribution with streamlined workflows for real-time stakeholder updates.
- Dashboard Development:** Designed and deployed interactive Power BI dashboards, using advanced **DAX** and data modeling to translate raw business data into actionable strategic insights.

Data Science & AI Trainer Sep 2025 – Present

- Program Leadership:** Trained and mentored **150+ learners** (university students to corporate professionals), bridging the gap between theoretical AI concepts and production-level industry application.
- Advanced Curriculum Delivery (DataHub Bootcamp):** Delivered a 150+ hour intensive track covering the full data lifecycle, teaching **Deep Learning architectures (CNNs, RNNs, Transformers)** with **PyTorch**, alongside NLP and Computer Vision.
- Business Intelligence Training (BI Bootcamp):** Led comprehensive training on data storytelling, guiding participants through advanced Data Modeling and dashboard design for business case studies.
- Project Mentorship:** Supervised end-to-end Capstone Projects, ensuring learners achieved job readiness by building deployable AI models and solving real-world data problems.

AI Co-Instructor Feb 2025 – Jun 2025

- Co-facilitated Python and AI training modules, simplifying complex algorithms into practical, hands-on exercises for multidisciplinary cohorts.

Petra Ride | Amman, Jordan Feb 2025 – Aug 2025

AI Engineer (Part-Time)

- NLP & Sentiment Analysis:** Architected an automated feedback system that analyzes Instagram comments (Positive/Neutral/Negative) and generates real-time, context-aware replies using **OpenAI LLMs**.
- Computer Vision & Security:** Implemented identity verification with **AWS Rekognition** face liveness detection and integrated it into the company's security infrastructure, strengthening user authentication and reducing fraud risk.

PROJECTS

AI-Powered Meeting Scheduler Bot (Voice & Text) | *Python, OpenAI API, Telegram API, Google Calendar API*

- Developed an AI agent that schedules meetings through **Telegram** using natural language (text or voice). It uses **OpenAI** to understand user intent and extract meeting details, then automates calendar event creation and email reminders via the **Google Calendar** and **Gmail** APIs.

Arabic Text Processing & Classification | *Python, Hugging Face (BERT), NLP*

- Developed an NLP pipeline for Arabic news classification, achieving **95% accuracy** with **BERT**, supported by Arabic-specific text preprocessing and feature engineering, and evaluated on accuracy and macro F1-score.

AI-Driven Occupancy Detection Using Multisensor Data | *Python, Scikit-Learn, Pandas*

- Developed a machine learning model for indoor occupancy estimation using non-intrusive sensors, enabling smart-building energy efficiency through real-time HVAC and lighting adjustments.

CERTIFICATES

- AWS Certified AI Practitioner
- Nutanix Certified Associate (NCA) 6.10
- Machine Learning Specialization | Coursera
- Neural Networks and Deep Learning | Coursera
- Generative Adversarial Networks (GANs) | Coursera
- The Complete SQL Bootcamp: Go from Zero to Hero | Udemy
- D-180 Digital Mentoring Program | Deloitte

EDUCATION

Al Hussein Technical University (HTU) | Amman, Jordan

2021-2025

B.Sc. in Data Science and Artificial Intelligence

Pearson BTEC / Al Hussein Technical University (HTU)

Feb 2025

Level 5 Higher National Diploma (HND) in Computing

KEY SKILLS

- **Languages & Frameworks:** Python, SQL (T-SQL), PyTorch, Scikit-Learn, Hugging Face Transformers, Pandas.
- **AI & Data Science:** Machine Learning, Deep Learning (CNN, RNN, Transformers), NLP, Computer Vision, BERT.
- **LLMs & RAG:** OpenAI & Claude APIs, LlamaIndex, LangChain, Qdrant, Hybrid Search (BM25 + Dense), RAG Evaluation, Prompt Engineering, AI Agents.
- **Cloud & MLOps:** AWS (Rekognition), FastAPI, RESTful APIs, Docker, Traefik, VPS Deployment, Git.
- **Data & BI:** Microsoft Power BI (Advanced DAX), MySQL, SQL Server, PostgreSQL, ETL Pipelines, Excel.
- **Automation:** n8n, Microsoft Power Automate.
- **Soft Skills:** Technical Training, Curriculum Design, Stakeholder Management, Public Speaking.

VOLUNTEERING

- Technical Team Member | Data Science Club – HTU | Apr 2023 – Dec 2023
- Teaching Assistant | Mind Lab – Amman, Jordan | Aug 2022
- Volunteer | The Children’s Museum Jordan | Nov 2021
